

FULL TRACEABILITY ACROSS THE SUPPLY CHAIN THROUGH DOCUMENTED ORIGIN

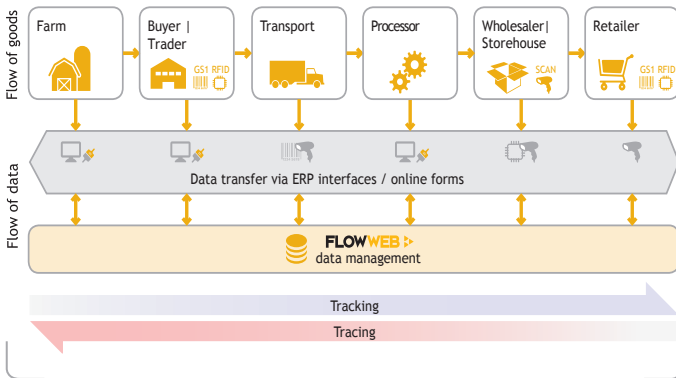

FLOWWEB

PROVEN TRACEABILITY SYSTEM ACROSS THE SUPPLY CHAIN

Flowweb is a web-based software system developed to track and trace single batches of a product along its chain of custody. By collecting data and supporting processes of all parties involved in the supply chain, batches can be tracked from their origin to the final destination (downstream) or in the opposite direction (upstream). Quantity and quality details are readily available with predefined settings and alerts. Flowweb ensures product safety across the entire supply chain.

FLOWWEB REFLECTING THE SUPPLY CHAIN

BENEFITS AND ADVANTAGES OF FLOWWEB

Traceability benefits

- Tracks single batches across the whole supply chain
- Compliant with traceability requirements of respective EU Regulations, IFS, BRC and other standards
- Short response time in non-conformity cases, e.g. product recall
- Access to automated information by involved parties according to predefined settings
- Integration of data through interfaces, e.g. to ERP systems or through web input masks
- Generic and modular software concept suited for food and non-food product chains
- All steps of product manufacturing, like mixing and sorting, are represented
- Cost savings through efficient documentation and verification
- Batch tree as graphical tool with adjustable level of detail
- RFID, GS1 and other identification systems easily integrated

Marketing benefits

- Strengthens users' position in business and communication
- Increases consumers' confidence in company and brand
- Enhances communication with media and markets through up-to-date stakeholder portraits

Further advantages

- Fast and simple data analyses and reports
- Customisable to individual requirements due to modular structure
- Multi-lingual software modules enable international supply chains
- Strict separation of data guarantees confidentiality at all levels
- Standardised platform with open interfaces enables communication with other systems
- Shared costs and promotion if jointly used by stakeholders
