

QUALITY MANAGEMENT FOR FOOD AND AGRICULTURAL PRODUCTS

NUTRIWEB

SYSTEMATIC QUALITY MANAGEMENT AND MONITORING

Nutriweb is the web-based software solution that comprehensively handles data to ensure the quality and safety of agricultural products. A wide range of information necessary to ensure quality requirements are met can be collected in Nutriweb directly online or via interfaces. Data on the quantity and quality of a delivered product can also be entered via interfaces and linked with manufacturing data. Through comparison analyses (benchmarking) and self-audits manufacturers are motivated to continuously improve quality. Additionally, inspection and certification results can be automatically transferred into Nutriweb. This increases both food safety and product transparency and provides clients with an extra quality guarantee. With Nutriweb quality management can be superb and highly efficient, strengthening both confidence and market position.

BENEFITS AND ADVANTAGES OF NUTRIWEB

Assurance of product quality

- Central availability of comprehensive quality and production data
- Superior product safety due to rapid alert system with error detection
- Systematic quality improvement due to benchmarking and specific consultancy
- Fast reaction to quality deviations
- Documentation support for farmers through integrated positive lists
- Automated import of supply and quality data via standard interfaces to ERP systems
- Compliance with all documentation requirements for quality standards (e.g. GLOBALG.A.P., QS, BIO)
- Security through import of external inspection and certification data
- Quality relevant data from manufacturing are available online for the next level

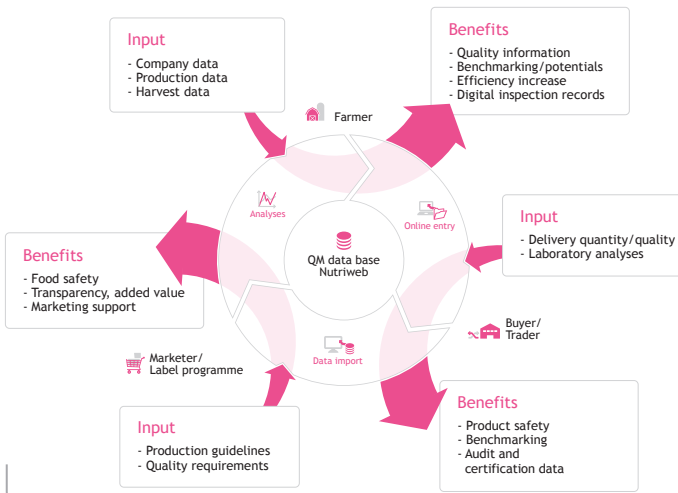

Marketing advantages

- Transparent production and full traceability
- Easy and immediate access to comprehensive data on any product, also available online
- Quick response in crisis situations
- Increased client trust and improved market position due to transparency and quality promise
- Web or point of sale communication with manufacturer portraits
- Added value for client and consumer

Further advantages

- Easy collection of defined production and quality data through farmers - online or via interfaces with agricultural software programs
- Facility to conduct early planning for production and sales volumes
- Multi-lingualism for international product lines
- Flexibility due to modular and individually adjustable design
- Restricted access guarantees data protection and confidentiality
- Time and cost savings in quality management
